HORIZON S Max 4K ULTRA HD

## Max Performance, Max Entertainment

Dual Light 2.0 Technology

Dual Light 2.0 technology is XGIMI's latest achievement in applying a "Wide Spectrum + Narrow Spectrum" hybrid light source technology. By combining both light sources, this technology creates a continuous natural spectrum, unleashing the full potential of both sources for exceptional picture quality in brightness, contrast ratio, color gamut, and color accuracy.
IMAX Enhanced & Dolby Vision Certified

With IMAX Enhanced, users can enjoy a true IMAX theater experience with a stunning big screen. Dolby Vision provides incredibly vivid effects, making your viewing experience even more immersive.
3100 ISO Lumens

Outstanding high brightness performance, unaffected by ambient light, lets you enjoy 4K cinema anytime. Immerse yourself in a vivid world of light and shadow.

Built-in Flexible Stand

Easily control the gimbal with one hand, ensuring optimal viewing angles from any position. The projector supports adjustments of 360° horizontally and 135° vertically, so you can project onto walls, ceilings, and other surfaces for a customized large-screen experience.

ISA 5.0

Making smarter and more user-friendly projectors has always been XGIMI's vision. With the brand new ISA 5.0 tech, XGIMI elevates adaptability, environment awareness, and calibration accuracy to new heights while ensuring top-notch image quality.

Remark:
1. The brightness data is from the XGIMI Laboratory. Actual product brightness may differ based on the specific test software version, testing environment, and product version.
2. All parameters listed on this page are measured in a controlled test environment before the product is mass-produced. The results may vary based on individual user experiences, including different environments, usage conditions, and firmware versions.
