Laser Lighting

The projector adopts advanced laser light source and creates only the exact color needed, thus using less power and is much brighter. Up to 50%* of power are saved compared to lamp-based projector to generate same level of brightness. The power-saving technology provides more options to reduce our carbon footprint.

* Compared with lamp-based projectors with similar brightness level.

Laser lifespan

IP6X

IP6X Rated

IP6X is one kind of Ingress Protection Rating published by the IEC (International Electro technical Commission). It is a high degree of protection against solid foreign objects. This exceptional dust-resistance ability ensures projector deliver reliable performance even in challenging environment, for example, high ceiling that is difficult to obtain regular cleaning.

Vero Series Projector

Vero Projector is a series of product with an eye on sustainability. By adopting Post-Consumer Recycled plastics (PCR) in the creation, we are demonstrating our commitment to reducing carbon emissions. The mercury-free light source eliminates the pollution from mercury lamp disposal. Up to 85% recycled paper and 100% recyclable packaging are used. Be part of a more sustainable future, with a green Vero projector.

24/7 Operation

24/7 Operation

The projector supports 24 hours-7 days of continuous projection when prolonged periods of use is required. This is especially useful for public display or museum exhibition.
